Lightweight roofing systems

# DOUBLE ROOFING

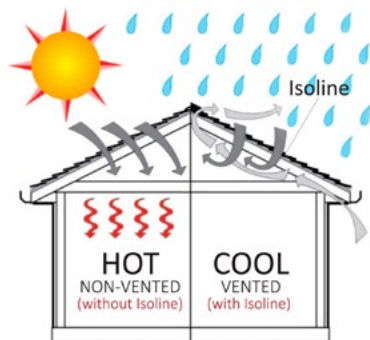

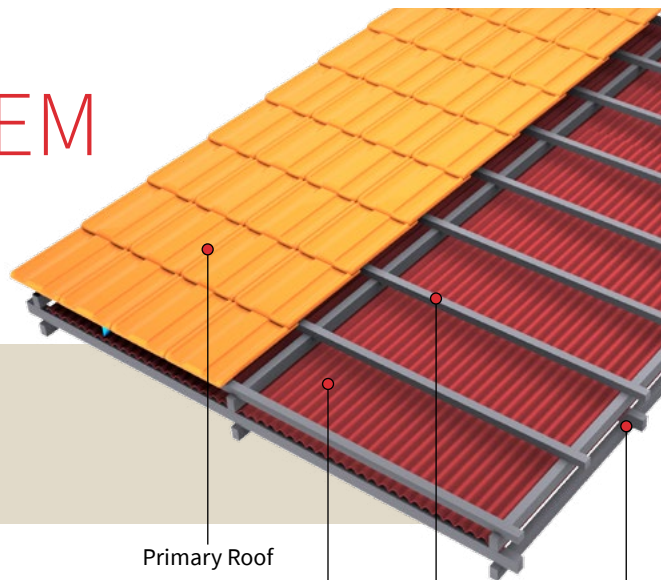

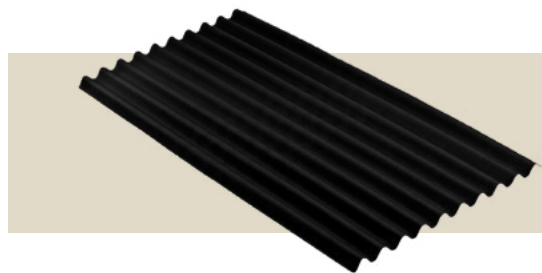

Best options for roof upgrade

Onduline provides effective solutions for roof innovation. This involves adding a layer of roofing material under or over the main roof to prevent leaks and improve indoor comfort.

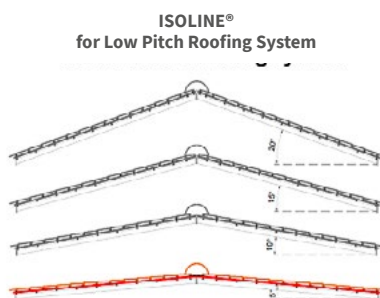

## Under-roofing

with **ISOLINE® SYSTEM**

Your best solution to improve roof quality, ventilation, sound and thermal insulation – and also an effective way to prevent roof leakages.

Existing purlin

## Over-roofing

Your best solution for leakage, re-roofing & repair of **OLD** roofs.

- Allows the thermal properties of the roof to be easily upgraded
- Convenient
- Simple & quick installation
- Reduce risk of condensation
- No health risk from disturbance of old roof
- Avoids costly removal of old roofs
- Minimum disruption to interior of building during re-roofing
